Unfortunately, the effect of eating an energy pill is short-lived, so you'll have to move fast. After the ghosts are gobbled up, their eyes head back to the chamber in the center of the screen for reincarnation. If you don't quickly gobble up the ghosts, they start to blink just before they turn back to their original colors and come after you again.

## HIGH SCORE

The high score is shown on the title screen. It is set to 3200 points the first time you play the game. You will hear a “ding-ding” sound when you pass the high score.

## TIPS

- Practice clearing the maze of dots before trying to gobble up the ghosts.
- Hang out near an energy pill before eating it and tease the ghosts into moving toward you. When the ghosts get close, eat the energy pill and gobble up all the ghosts.
- The openings in the maze are escape tunnels. Go through the tunnels to move quickly to the other side of the maze.
- Don't forget, different mazes have different tunnels and not all mazes have tunnels! Some are stranger than others!

## GAME PLAY

Your goal is to score as many points as you can while you eat dots, bonus objects bouncing around the maze, energy pills and ghosts. Score 15,000 points (*see Options*) and earn a bonus life.

The game starts with you having three lives (*see Options*), which are indicated by Pac-Man symbols at the right side of the screen. When the game play begins, your character is located close to the center of the screen, just below the ghosts' reincarnation chamber in the center of the maze. Use your controller's DISC to move through the maze. When you pass over dots, you gobble them up, and you score points. If you eat all the dots on the screen, the maze flashes momentarily, and you move on to the next level. 

Ms. Pac-Man encounters bouncing objects traveling around the maze. Gobble up these munchies and you score bonus points.

But watch out! Fearful ghosts scurry about trying to gobble you up. Your only recourse is to eat an energy pill and then go after the ghosts. The pills are generally located in the corners of the maze, are much larger than the other dots, and blink. As soon as you gulp down an energy pill, the ghosts turn blue with fright. This is your chance to eat them! 

You earn 200 points for the first ghost, 400 points for the second ghost, 800 for the third ghost and a whopping 1600 points for the fourth ghost, all on the same energy pill.
